

SMART SOLUTIONS FOR THE LABELING INDUSTRY

SMALL LABEL DISPENSER

model DP03

Small Electronic Dispenser Series is the ideal solution for your label handling operations like the food packaging sector.

Versatile, simple to use, reliable, and tough, our small electronic dispensers are available in two different models and will make it easy for you to apply labels in your manufacturing process.

All the dispensers have a top to write on the label before detachment and are equipped with an external auto-switching 100/240VAC - 2.5A at 24V power supply and an electronic circuit controls the functions with a protection 3.15A fuse.

model DP02

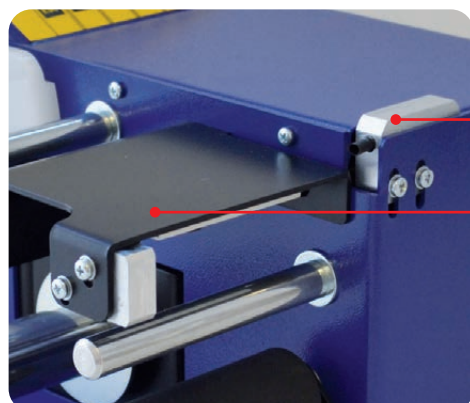

SPECIFICATIONS

Features	DP03	DP02
Maximum label width	70mm (2.75")	150mm (5.90")
Maximum roll diameter	200mm (7.87")	200mm (7.87")
Minimum core holder	20mm (0.78")	20mm (0.78")
Maximum peel length	180mm (7.08") *	180mm (7.08") *

* Software for labels length up to 600mm (23.62") available on request

Control panel

Sensor for label detection

Shelf for writing labels on

Electronic Features

- Photocells for the label's detection
- Tachymeter for the control of the label's length to detach

Software Control Characteristics

- Personalization of the company's name
- Control of the photocells' functionality
- Setting to control the number of labels to detach
- Constant visualization of the detached labels' number
- Acoustic signal when the number of detached labels reaches the preset quantity
- Setting to control the peel length of the label
- Constant visualization of the detached labels' series' number
- Acoustic signal when the detached labels' series' number reaches the preset quantity
- Setting of the label's length to detach
- 3 types of advancing:
 - Automatic
 - Timed
 - Manual by pushing ESC
